# WHAT IS HAIR TRANSPLANT?

akclinics.org

akclinics.org

Hair Transplant is one of the most important achievements of the last century by medical science. There had been unlimited efforts to restore hair or natural looks; which lead to manufacturing of wigs etc from very old times. The only success was seen when Hair Transplant started in the form of Punch Grafting and reaching to today's most advanced technique in Hair transplant as *Bio-DHT*, a trademark of AK Clinics.

Hair transplantation is a surgical procedure in which hair from the back of the scalp is taken and transplanted in the bald area. **The advantages of Hair Transplant include.**

- 100% natural.
- No maintainence required once done.
- Permanent Solution.
- No side effects.
- Cut, Color, Style naturally

## Hair Transplant @ AK Clinics

At AK Clinics, we specialize in the treatment of male and female pattern hair loss. Our experienced surgeons have seen all kind of indications and complications and hence poised to give best results in over 95% of the patients.

Our doctors understand the need of each patient and tailor make the solutions for them & not a generalized plan of action.

Celebrate  
life  
with  
us

I was received by a team of real Professionals who know their work perfectly. They were able to answer all my questions and guide me on the procedure.

Maina (Kenya)

I am feeling quite comfortable things were explained in detail before procedure. So I was not anxious at all whole staff is humble and I am thankful to Dr. Kapil dua and Dr. Aman Dua for making me so comfortable during whole procedure.

Akash (Ludhiana)

Hair Transplantation went well, doctors and helping staff were really courteous and knowledgeable Dr Kapil Dua and Dr. Monica really took care of me during and after the surgery and checking my comfortness all through the day

Venkata (Chennai)

I wish to offer a testimonial of my experience at AK Clinics. My experience has been fantastic from my initial email enquiry, all the way to after care and home care advice.

Clair (UK)

Excellent overall  
Staff were friendly + efficient  
Facilities were good  
Care pre-op + post-op excellent

Raman (Iceland)

# TYPES OF HAIR TRANSPLANT

## BIO-FUE™ HAIR TRANSPLANT

This is a trademark technique of AK Clinics. This is an improvised version of FUE that has not only given better results over FUE but also quicker healing to the patients. The even further refined technique is Bio-DHT

01

02

## FUT

In this technique, a strip of hair is taken from the permanent zone and is dissected in individual grafts under magnification for implantation. There on the resultant donor area is sutured.

03

## BIO DHT™

The experienced surgeons at AK Clinics established the correlation between out-of-body-time and growth of transplanted hair to launch Bio-DHT. In this technique the results are seen much quicker and definitely better.

04

## GIGA SESSION

This is the technique in which very large area of baldness is covered in one session of more than 4000 grafts. We combine various techniques like FUT, Bio-FUE and BHT to achieve the same.

05

## BODY HAIR TRANSPLANT

AK Clinics specializes in body hair transplant with its custom punches. This technique is very useful for large FUE sessions and for people where donor area is very limited.

# WHY CHOOSE US

*We strive to provide highest quality Hair transplant at affordable cost at our state-of-the-art hair transplant centres*

## International Organisations that recommend our surgeons

International Alliance of  
Hair Restoration Surgeons

### NATURAL HAIR LINE

Owing the experience of our surgeons you'll always get right hair direction that is very important. Our patients are extremely happy because they get absolutely natural looks.

### HIGH GRAFT YIELD

Our endeavour is to have minimum follicular transection rate in order to save donor area and harvest strictly from permanent zone only. We've a controlled FTR below 5% in FUE.

### HT COST

We offer services at an affordable cost definitely not cheap. The cost ranges from INR 90K (USD1500) to INR 2.0 Lac (USD 3450). To get free counseling & tailored quote speak to us today.

### PAIN-FREE PROCEDURE

Our special anesthesia technique ensures that our patients feel no pain during or after the procedure. We properly prepare the area by using anesthetic gels, vibrator & nerve blocks.

### GRAFT GIVEN BY COUNTING

Our team always ensure that the out-of-body-time of grafts is minimum in order to have the highest graft yield. We ensure that grafts are saved from any mechanical trauma or dehydration.

### ULTRA HYGIENE

We follow all the international standards for hygiene & safety of the patient. This entails regular cultures & disinfection protocol to achieve the best results

# Frequently Asked Questions

## Who all can undergo hair transplant?

- A.** Hair transplantation is a surgical technique in which the grafts are taken from the back – the permanent zone and implanted in the front.
- Age of the patient should be 23 yrs or older; in certain cases like traction alopecia, it can be planned earlier too
  - Inadequate response to medications.
  - Significant hair loss.
  - All other causes of Hair Loss have been ruled out.
  - No medical contraindications to surgery.
  - Reasonable patient expectations.

## Are unlimited number hair possible?

- A.** There is nothing like unlimited hair. The hair are taken from the back and distributed in the front with good cosmetic density. The clinics that claim unlimited hair are largely misleading.

## Do the hair grow naturally after the surgery?

- A.** Yes!! The hair grow naturally after the surgery. The best results are seen in 12 months. You can cut, color or style the hair as you want. This is the only natural treatment of baldness.

**Q**

## What is the success rate of hair transplant?

- With the experience of surgeons at AK Clinics, results have never been a problem. For sure Hair Transplant being a medical procedure may give varied results in 2-5% patients. But one does not need to be worried, we redo the procedure with only OT charges.
- A.**

**Q**

## Are there any side effects of the Surgery?

- There are no known side effects of the surgery. This is absolutely safe surgery in the hands of experienced surgeons.
- A.**

**Q**

## Is the treatment painful?

- In the hands of AK Clinics Surgeons, the patient experiences minimal discomfort. We use special anesthesia technique to ensure that the whole treatment is absolutely pain-free. Also we administer nerve blocks that cut down the number of pricks considerably and lead to prolonged anesthesia.
- A.**

8.

**Q**

## Does this procedure need admission to the clinic?

- A.** No. The patient gets discharged the same day after the procedure. There some precautions required that one needs to take at home.

**Q**

## Is it possible in one sitting or more sittings required?

- A.** One sitting for scalp covering as much as possible is the main target & one can target higher density in 2nd or 3rd sitting. Though on the front we always give good density. We normally recommend a difference of 6-8 months for a subsequent hair transplant.

**Q**

## How many hair follicles are possible in one go with FUE?

- The no. of follicles possible vary with the density. Though only from the scalp the upper limit is around 4000-4500.
- A.**

**Q**

## What precautions are required before the transplantation?

- We send you a complete list of pre-op instructions to be followed, so you really don't need to worry.
- A.**

**Q**

## Do the transplanted hair undergo hair loss?

- No transplanted hairs don't undergo hair loss, the reason is that the grafts are taken from the hair zone in which there is no effect of hormone.
- A.**
